

# Pool Pump Timers

## Put money back in your pocket with this easy upgrade

Pool pumps can suck up significant energy every time they run. But there's an easy solution: a pool pump timer. Take the reins on your pool pump's hours while saving on your energy bill each month with this upgrade.

### What is a pool pump timer?

When it comes to your pool pump, time really is money. A pool pump timer lets you decide when, how long, and how often your pool pump runs. In other words, it puts you in control of how much energy and money it takes to maintain your pool. With the addition of a pool pump timer, you can keep your pool clean and save some green, all at the same time!

To make sure it's done right, you'll need to set the pool pump timer to run the minimum number of hours needed to maintain your pool, typically about eight. But the hours don't need to be consecutive—you can split them up so that a majority of the energy your pool pump uses avoids on-peak periods (2–7 p.m., M-F, June through September excluding holidays). Consult with your pool maintenance professional to ensure the timer is set to run long enough and at the right time of day to keep your pool clean.

This approach will cost less but give you the same results. There's no reason to pay more than you need to!

### Why a pool pump timer is worth every penny

#### **COST SAVING**

A pool pump timer can reduce your energy bill by allowing you to run your pool pump during off-peak hours.

#### **COMFORT**

Relax. You get to enjoy your pool without worrying about the cost, because your pool pump timer is hard at work behind the scenes (and after hours).

#### **SAFETY/HEALTH**

Your pool's water needs to be filtered daily, but that doesn't mean your pool pump should run 24/7. A properly scheduled pool pump timer ensures that your pool is clean, comfortable, and cost-effective.

## Let's talk about rebates!

We offer a rebate of 50% of the cost up to \$150 for your pool pump timer as a part of our Home Energy Improvement Program. This means you save money in the long run while earning a rebate.

The rebate includes installation of:

- ▶ Up to two pool pump timers per account, per year
- ▶ A timer on an existing pool pump OR installation of a new pool pump with a timer

## What are the considerations?

You can work with your pool maintenance professional or use this as a DIY opportunity that saves you money now and long-term.

Remember to consult with your pool maintenance professional to ensure the timer is set to run long enough and at the right time of day to keep your pool clean.
